

Cline Tool Named AutoCrib Premier Distributor for 2013

Cline Tool is proud to announce that the company has been named as an AutoCrib Premier Distributor for 2013. AutoCrib, Inc. (Santa Ana, CA), a global leader in industrial vending machines and automated inventory control, recently announced their list of AutoCrib Premier Distributors for 2013. Premier Distributors have demonstrated the ability to provide the highest level of system design and consulting, field support and automatic inventory replenishment services, through a commitment to continuing education and dedicated personnel. "AutoCrib distributors represent us around the globe," states Steve Pixley, CEO. "They are an integral part of our brand and we are very proud that Cline Tool has earned Premier status. Our Premier distributors are providing a completely integrated turnkey solution: hardware, software, setup, training, service and support. We hope that potential customers will reach out to them first because of their years of hands-on experience and deep expertise in the processes required to dramatically cut inventory costs in any kind of manufacturing environment."

Cline Tool has not only installed more systems than most distributors, but has also grasped the benefits of training their personnel in both the superior service and rapid support of AutoCrib systems. Because of their dedication to continuous education and their strong business partnership with AutoCrib, they have rightfully earned the status of 'Premier Distributor'.

"We are exceedingly gratified to be counted as an AutoCrib Premier Distributor", explains Jim Long, President and CEO, "Partnering with AutoCrib delivers to our customers the broadest line of automated industrial vending solutions in the world with Cline Tool's deep expertise in industrial tooling and manufacturing supplies. Working together we bring the greatest possible cost savings and efficiency to our customers and the advantage of better managing our own supply chain by integrating AutoCrib systems."

About AutoCrib, Inc.

AutoCrib [www.autocrib.com] delivers automated inventory vending systems (software and machines) for manufacturing companies who want to provide 24/7 unmanned access to inventory while maintaining complete control and 100% inventory accuracy. AutoCrib software provides real-time information on all inventory in the system from any computer, tablet or smartphone anywhere on the planet. AutoCrib has been providing industrial vending solutions since 1994 and has deployed over 15,000 systems worldwide. AutoCrib's product line includes handheld scanners, automated lockers, traditional coil/helix machines, a PPE specific dispensing machine, RFID systems, vision based tool cabinets as well as small and large robotic carousel systems with optional counting scale attachment. The systems can be managed by AutoCrib's powerful client/server software or its web based application, AutoCrib.net.
